

# TS154G

Herewith you can find license numbers to get access to the server:

Part No: P 002 010 100

TS ID: TS154G\_023

Main License: **CC97-PX24**

Mirror License: **CV59-DD24**

**Expire date:** 1 year after first access to server

We remind you that this document is very important, so please store it safely.

This license gives you the right to use the Power On Bridge for the indicated modem and for only one connection. You can reach the modem from multiple computers but only the first to connect may establish the link.

The data read from the PC connected to the Power On Bridge can be shared to an unlimited number of PCs via the local network.

You can ask Power On to issue additional licenses for the modem for simultaneous connections to multiple PCs.

If you have any queries or require assistance, please email us at the following address:

[supporttelemetry@poweron.it](mailto:supporttelemetry@poweron.it)

### **New TS154G kits:**

License starts the first time you connect your Telemetry System to the server, and it expires one year after the first connection.

### **Annual upgrade TS154G:**

If you already own a TS154G and you have to get the annual maintenance to get access to the server, license starts on the day you buy it and it expires one year after the purchase.
